

We'd like to make something perfectly clear.

# The Air.

Beginning January 14, 2008, Bay Area Medical Center is making all its facilities 100 percent tobacco-free. This policy applies to everyone – patients, family, visitors, volunteers and staff.

So beginning January 14, if you need to light up, you'll have to go elsewhere. But we'd really like it if you decided to go tobacco-free yourself. Your lungs, heart, family and friends will be glad you did.

A tobacco-free campus is just one more way Bay Area Medical Center is setting the standard for health and wellness in Marinette and Menominee Counties and the surrounding communities.

For information about smoking cessation programs, contact the American Lung Association® at 800-LUNG-USA.

The American Lung Association offers a new way to stop smoking through its Freedom From Smoking® online smoking cessation clinic.

Find out more by visiting the American Lung Association website at [www.ffsonline.org](http://www.ffsonline.org).
